- ✓ The New Roads and Street Works Act 1991 (NRSWA) requires that there is a qualified operative on site at all times while works in the Highway are in progress. The qualifications held must be appropriate for the work being carried out. The act does not require all the relevant qualifications to be held by a single operative - the main requirement is that there is always at least one operative on site whose qualifications match the activities being undertaken (eg you don't need the modular reinstatement module if you're not reinstating block paving)
- ✓ The act also requires that the site is supervised by a person having a prescribed qualification as a supervisor. The supervisor is not required to be on site at all times. A qualified supervisor might therefore supervise a number of sites.
- ✓ You can be qualified as an operative, a supervisor, or both. A supervisor qualification does not mean you are qualified to work as an operative. However, if you hold operative and supervisor qualifications, you will be qualified to work as either, or both.
- ✓ It is an individual not a company – so it depends on whether the company you contact have someone appropriately qualified.
